PROFESSIONAL SUMMARY

DevOps Engineer with hands-on experience in cloud infrastructure, **CI/CD pipelines**, and **containerized deployments**. Skilled in **AWS, Docker, Kubernetes**, and automation tools to build scalable, reliable, and efficient systems. Passionate about optimizing deployment workflows and ensuring high availability.

EDUCATION

Gautam Buddha University

B.Tech - Computer Science and Engineering

CGPA - 8.08/10

2022-2026

WORK EXPERIENCE

Rapidcode Technologies Pvt. Ltd., India

Dec 2024 – Jun 2025

DevOps Engineer Intern

- Architected and deployed scalable containerized applications using **Docker and Kubernetes**, improving deployment efficiency.
- Reduced deployment time by ~40% by implementing automated **CI/CD pipelines** using **GitHub Actions and Jenkins**.
- Managed cloud infrastructure on **AWS (EC2, S3, IAM)**, ensuring scalable and reliable deployments.
- Improved system reliability and decreased downtime by implementing monitoring with Prometheus and Grafana.
- Engineered deployment and operational workflows using Python and shell scripting, minimizing manual errors.

TECHNICAL SKILLS

Cloud & DevOps: AWS (EC2, S3, IAM, VPC, ELB, Auto Scaling, RDS, Lambda, ECR, ECS/EKS, CloudWatch), Microsoft Azure, Google Cloud Platform (GCP)

Infrastructure as Code & Configuration Management: Terraform, AWS CloudFormation, Ansible, Puppet, Chef (Basic)

Containerization & Orchestration: Docker, Kubernetes

CI/CD & Automation: Jenkins, GitHub Actions, Shell Scripting, Python

Monitoring & Logging: Prometheus, Grafana, ELK Stack (Elasticsearch, Logstash, Kibana), AWS CloudWatch

Web Servers & Networking: Nginx, Linux Administration, TCP/IP, DNS, HTTP/HTTPS

Version Control & Tools: Git, GitHub, VS Code, Linux Terminal, Postman

PROJECTS

CloudNestIDE— Browser-Based IDE Platform

Personal Project | React, Node.js, Docker, AWS (CI/CD)

GitHub: https://github.com/hsharma212502-sketch/CloudNest_IDE

- Architected a browser-based IDE platform with an integrated code editor, file explorer, and real-time terminal.
- Engineered a responsive **React + Vite** frontend optimized for performance and developer focus.
- Built a **Node.js backend** to manage terminal execution and file system operations securely.
- Resolved terminal rendering and resizing challenges using **xterm.js** for accurate cursor behavior.
- Designed a Docker-ready architecture and implemented an **AWS CI/CD pipeline** for streamlined builds and deployments.
- Applied cloud-native and DevOps best practices to improve scalability and maintainability.

AWS Node.js Application — CI/CD Deployment Pipeline

Personal Project | Node.js, GitHub Actions, Docker, AWS EC2, Nginx

GitHub: https://github.com/hsharma212502-sketch/AWS_Node.js_Deployment

- Architected a fully automated CI/CD pipeline on **AWS** for a Node.js application using **GitHub Actions**.
- Configured continuous integration and deployment workflows triggered on GitHub commits.
- Containerized the application with Docker to ensure environment consistency and portability.
- Deployed and managed the application on **AWS EC2**, integrating **Nginx** as a reverse proxy for secure traffic handling.
- Built **SSH-based deployment** pipelines to ensure consistent, reliable, and repeatable releases.

CERTIFICATES & ACHIEVEMENTS

- Attended the **AWS International Conference, IIT Delhi - 2024**
